AICI forum velden
artificial intelligence in clinical imaging
30-31 OCT
2020
Velden AUSTRIA
www.aici-forum.at

The 1st international AICI Forum has been a great success with more than 250 participants out of 16 nations, 22 speakers, and 14 exhibitors. In 2020, this interdisciplinary single-track event is going to focus on AI-based screening, radiomics, clinical impact, security, and professional challenges of AI in clinical imaging. Still we believe that several stakeholders of the healthcare system need to shape the conversation on the future of medical diagnostics.

The 2nd AICI Forum is going to set the stage for state-of-the-art keynotes, translational research presentations, tutorials, networking, pitching of software solutions, and a panel discussion featuring selected experts of different fields. It will take place in Velden/AUSTRIA, a pittoresque place near the 3 countries corner of Austria, Italy, and Slovenia. The venue is within taxi distance to the international airports of Klagenfurt and Ljubljana. Velden is a Railjet train stop and is located close to the motorway interchange A2/A9/A10.

Be assured that this unconventional meeting which aims to bring together different viewpoints will be worth the journey.

Thomas Kau (Villach, Austria)
Registration opens on 1 May 2020
CME/CPD Credits requested

Program committee:

Gerhard Friedrich – Günther Grabner – Klaus Hausegger – Thomas Kau – Georg Langs – Helmut Prosch – Kurt Zatloukal

Sponsorship opportunities: christoph.schreiner@nubid.at
